Problem Solving

25. **Number Sense** Is $8.7 - 0.26$ greater or less than 8? Explain.

You can use mental math.

26. **Use a Strip Diagram** When Matt left his home in Red Grove, his odometer read 47,283.5 kilometers. By the time he had arrived in Grand City, his odometer read 48,163.7 kilometers. How many kilometers did Matt travel?

27. One of the largest dinosaurs ever found, the *Puertasaurus*, measured 39.92 meters long. One of the smallest dinosaurs, the *Compsognathus*, measured 1.43 meters long. What was the difference in length of these dinosaurs?

- A 41.35 meters
- B 38.59 meters
- C 38.49 meters
- D 29.49 meters

28. **Extend Your Thinking** In one week, Jessica spent 2.35 hours walking from her house to work. Together, Jessica and her friend, Constance, will spend 4.21 hours of their week walking from their homes to work. How many hours does Constance spend each week walking from home to work?

29. **Mental Math** How could you use compensation to find $225 + 47$?

30. **Estimation** Estimate the difference of $34.79 - 12.23$ by rounding to the nearest whole number. Explain your process.

31. Jackie found the difference of 40.5 and 5.51. Is her answer correct? If not, explain her mistake and write the correct answer.

$$\begin{array}{r} 40.5 \\ - 5.51 \\ \hline 2.54 \end{array}$$

32. **Draw a Picture** Use hundredths grids to find the difference of $1.2 - 0.87$.
